

Your Retirement Lifestyle Plan

Retirement Goal

In what year would you like to Retire? _____

How much money will you need to live on after you Retire? Because your Retirement is many years in the future, it's difficult to predict. Usually, the best approach is to make your Retirement Goal equal to the amount you are spending today (excluding taxes and savings) to maintain your current lifestyle. Do not include the cost of the Other Financial Goals that you will enter below. Enter the amount of after-tax cash you need each year (today's dollars).

Retirement Living Expense Amount: \$ _____

Other Financial Goals

Think about all the Goals you would like to accomplish for which you will save and invest (do not include expenses that will be paid from employment income). Include what you need, like paying for the kids college, what you want, like taking a special vacation, and even what you wish you could do, like buying a beach house. Make each one a separate Goal, with a description, an annual cost and how often it will occur (see Step 1 of the sample plan.) Then put a number in the box next to each Goal (including your Retirement Expense Goal) to indicate its order of importance.
